

The information about T5320A PTCRB certificate

1. Customer can log in the PTCRB website (www.ptcrb.com) to view the information about T5320A PTCRB certificate. The **User Name** is **fli** and the **Password** is **59660**.
2. Please click the **Certification Database** and then choose **View Certified Products**.

The screenshot shows the PTCRB website header with navigation tabs: Documents, Databases, Members, and Update Profile. The 'Databases' tab is active, and its dropdown menu is open, listing options like Home, Submit New Request, Check/Update Request, View Certified Products (highlighted), View IMEI TACs, View Withdrawn Requests, and View Authorized Test Labs. Below the header, the breadcrumb trail is 'home > view certified products'. The main heading is 'View Certified Products'. A message asks the user to select products and search terms. There are two radio buttons: 'Shanghai Simcom PTCRB Certified Products' (selected) and 'All PTCRB Certified Modules'. A search input field is present with a placeholder '(Place "AND" between search terms to perform an "AND" search)'. A 'View Products' button is highlighted with a red box.

3. Click the **View Products** button to get the T5320A PTCRB certificate information.

The screenshot shows the 'View Certified Products' page. Below the breadcrumb trail, there is a message: 'Below is a list of the certified products. Select a product and click on the Model # to see all certified Hardware/Software versions. Search within the list of certified products by entering the search term(s) and clicking Search. Place "AND" between search terms to perform an "AND" search.' A search filter is applied: 'Search within results: [input field] Search » Return All'. The results show 11 records. A table lists the certified products with columns: Manufacturer, Model #, and Supported Technologies and Frequency Bands. The 'T5320A' product is highlighted with a red box.
